

Capitol City Telephone Announces Business Communications System Buy Back Program

Companies to Benefit from a New Program Within the Current Technology Assurance Plan (C-TAP) to Ensure Implementation of Latest Technology

LINCOLN, NE — September 28, 2006 — Capitol City Telephone, an industry leader in telecommunications, announced today that the company launched the business communications Buy Back Program, a new component of the Current Technology Assurance Plan (C-TAP). The Buy Back Program embedded in C-TAP gives Capitol City Telephone the ability to offer cash back to a customer for their existing communications system. By taking advantage of this unique opportunity, companies will enjoy all of C-TAP's benefits, while reinvesting the money they receive from Capitol City Telephone and their strategic partner GreatAmerica Leasing Company, back into their business.

Since its inception in June of 2005, C-TAP has emerged as the telecommunication industry's most innovative program. C-TAP ensures that the telecom and information systems of small to mid-sized companies remain current. C-TAP encourages companies to incorporate the latest in technology by giving them the ability to refresh their phone equipment after 24 months without a change in payment. In addition, new equipment and applications are installed without labor charges. Technology can be added as needed within a fixed cost that can be absorbed by an organization's operating budget. Essentially, C-TAP allows continuing implementation of new technology within a set guideline.

Capitol City Telephone's customers on the C-TAP program will

receive numerous benefits. These benefits include unlimited in house moves and changes, unlimited remote programming, routine software upgrades and patches, call accounting analysis, storage system and backup, remote database backup, records and training updates for the equipment administrator, and an annual audit of connectivity charges. C-TAP also provides businesses with special customer service provisions including: priority queuing for adds, moves, changes, dispatch of service calls, a guarantee of inventory on hand, preferred maintenance, periodic replacement of handset and station cords, and annual preventative maintenance visits.

When companies opt for the Buy Back Program they automatically become a part of C-TAP. The age of the system will determine the amount of cash back they will receive. For example, if a system is 12 months old Capitol City Telephone will pay the customer 80% of the original cost. When the transaction occurs, the customer makes monthly lease payments reversing the original outlay for system's large capital investment. Thus, the customer always keeps their technology current moving into the future and now they show a fixed cost in their operating budget from lease payments. In order to qualify for the Buy Back Program, Capitol City Telephone's customers will need to meet specific criteria including credit approval from GreatAmerica.

"Our goal with C-TAP and the Buy Back Program is to have a proactive versus reactive relationship with our customers," said Marty Walter, president of Capitol City Telephone. "The addition of the Buy Back Program provides us with the

tools to help achieve our mutual goals. These goals include providing our customers with the highest level of customer service in the industry and at the same time offering the latest in business communications technology at a fixed cost. Furthermore, C-TAP supports our mission of helping our customers increase their profitability, while achieving a dominant position in their marketplace."

ABOUT CAPITOL CITY TELEPHONE

Capitol City Telephone was founded in 1993 by Bob Walter to provide the highest levels of service to businesses in Nebraska. Previously, Walter was a co-owner of Midwest Telephone and Sound for 11 years. Capitol City Telephone is a factory authorized dealer of a number of telephone systems, including ESI, NEC, and all Panasonic systems. Capitol City Telephone is a member of the Technology Assurance Group (TAG), the nation's leading organization of independently owned telecommunications companies. The TAG relationship enhances Capitol City Telephone's ability to provide its business customers with voice and data services on a national basis as well as access to a wide variety of products and the industry's best rates for long distance and Internet services.
